

TABEA C. MITTMANN

Münster, Germany — t.mittmann@uni-muenster.de — LinkedIn

MD candidate at the University of Münster with a strong interest in translational research at the intersection of cancer biology, molecular medicine, and clinical care. Wet-lab experience in CRISPRi functional screens and RNA biology from a research stay at UCSF.

EDUCATION

Westfälische Wilhelms-Universität Münster — Doctor of Medicine (MD)

Apr 2019 – May 2027

State Exam M1 (2021) and M2 (2025): grade 1, top 1%. USMLE Step 1: Pass (2024); Step 2 CK: 273.

Münster, Germany

RESEARCH EXPERIENCE

University of California, San Francisco — Visiting Student Researcher

Apr 2022 – Sep 2023

Goodarzi Lab — RNA-binding proteins in breast cancer metastasis (Boehringer Ingelheim Fonds MD fellowship) San Francisco, CA, USA

- Designed and executed multiple CRISPRi functional screens to investigate the role of RNA-binding proteins (RBPs) in breast cancer progression and metastasis.
- Applied molecular biology techniques: cell culture, molecular cloning, PCR, single-cell RNA-seq, and RNA-seq library preparation.
- Contributed to translational cancer research at the intersection of RNA biology and disease mechanisms; co-authored the resulting paper in *Science Advances* (2026).

PUBLICATIONS

Karner H., T. C. Mittmann, *et al* **Integrative analysis of mRNA stability regulation uncovers a metastasis-suppressive program in breast cancer.** *Science Advances* **12**, eaea9061 (2026). doi:10.1126/sciadv.aea9061

Khoroshkin M., ..., T. C. Mittmann, *et al* **A generative framework for enhanced cell-type specificity in rationally designed mRNAs.** *bioRxiv* (2024). doi:10.1101/2024.12.31.630783

FELLOWSHIPS & HONORS

Studienstiftung des Deutschen Volkes (German National Academic Foundation), three-year fellowship — 2023–2026 —

Boehringer Ingelheim Fonds MD Fellowship (17 months) — 2022–2023 — **First** (2021) & **Second** (2025) **State Exam in Medicine** — grade 1, top 1%.

TEACHING

Biochemistry Laboratory Course Tutor (2021) — **Anatomy & Imaging Course Tutor** (2020, 2022) — **MeDocs — IT Support for Lecturers** (2020–2021), University of Münster.

SKILLS

Wet lab: mammalian cell culture, molecular cloning, PCR, CRISPRi functional screens, lentiviral vector handling, single-cell RNA-seq, RNA-seq library preparation.

Topics: cancer biology, molecular biology, translational research, RNA biology, breast cancer metastasis, mRNA stability.

Clinical: University of Münster MD curriculum (preclinical + clinical); final-year clinical rotations (Praktisches Jahr); USMLE Step 1 and Step 2 CK passed.

Languages: German (native), English (fluent — TOEFL 115), French (fluent — DELF B2).
